WPC WINDOWS & DOOR FRAMES

ABOUT US

It takes years for a sapling to become a tree but hours for the humans to destroy it. Of this, around 50% of the trees cut are catered to the construction purpose alone. It is a nature friendly alternative to wood. With Hixon, we are now able to cater the construction needs without cutting a tree. When it comes to being pro-ecological, we have a vast experience of about 3 decades where we have been manufacturing an environmental friendly substitute for fire wood. This new product Hixon is another feather in our hat. We always believe that the earth doesn't belong to us, but we belong to the Earth.

WHY HIXON

■ ABOUT PRODUCTS

Looking for a better replacement for wood and save nature? then here it is... Hixon Synthetic Wood (also known as WPC) is a revolutionary product designed to compete with the strengths of wood and overcome its weakness. WPC is used for making door frames, window frames, doors, and sheets, which are long - lasting, Eco-friendly, and value for money.

The Door Frames, Doors, and Sheets can be fabricated with the help of traditional carpenter tools and can be painted or polished WPC is a blend of polymer material and some additives.

- **WPC DOORS**
- **PVC SHEETS**
- **WPC FRAMES**
